Process Quality Engineer

Date posted

04/07/2021

Description

Abertax Quality Ltd in Malta is looking to recruit a Process Quality Engineer to join their team on a full-time basis. The ideal candidate should be in possession of a Bachelor's degree in mechanical / electrical engineering from the University of Malta or equivalent.

Hiring organization

Abertax Quality Ltd

Responsibilities

- Improve process yields and machine uptime.
- Participate in troubleshooting of production machinery together with the maintenance team.
- Work together with the Production Supervisor to ensure on-time deliveries.
- Ensure finished goods are of good quality.
- Give and demonstrate one-point lessons to operators.
- Collaborate with all other departments to identify and solve quality issues.
- Comply with ISO 9001 requirements.
- Understand customer requirements and ensure that these are met.
- Extract and analyse production data for improvements.
- Participate in incoming goods inspection.
- Setting up of production equipment according to quality standards.
- Promote EHS awareness throughout the factory.
- Participate in the commissioning of new production equipment.

Qualifications

- Degree in mechanical / electrical engineering.
- Good communication and teamwork skills.
- Be proactive and with a hands-on approach.
- Knowledge of ISO 9001 and IATF 16949 requirements is considered an asset.
- Experience in a manufacturing environment is considered an asset, but training will be given.
