

Environmental Policy

Abertax Quality Limited declares full commitment to fulfil all compliance, and regulatory obligations and further demonstrates its commitment to the protection of the environment.

Abertax Quality Limited is committed toward to improving its Environmental Performance, by:

- Reduce:
 - o Packaging & general waste generated
 - o Fossil fuels (electricity & fuel) and water consumption
 - o Reduce internal scrap
 - o Consumption of papers through digitization of business process
- Reuse:
 - o Scrap and injection runners
 - o Heat from chillers to warm up plant
- Recycle:
 - o Waste generated (plastic, paper, cardboard, organic)
- Renewables
 - o Increase the use of green technology

Abertax Quality Limited is committed to the continual improvement within our environmental system and to comply with the requirements of ISO 14001:2015.

We have the feedback mechanisms in place to gather information about our environmental performance and are committed to regularly analysing this information so that we can make the necessary changes to enhance our environmental performance.

We recognize that the impact on the environmental performance depends on the everyday actions of those working within the teams of Abertax Quality Limited. We are all committed to communicate with all stakeholders their roles within the company's management system, and

to developing our personnel's skills through training and mentoring in both their professional and vocational interests.
